Vim

Exiting	
:q	Close file
:qa	Close all files
:w	Save
:wq | :x	Save and close file
ZZ	Save and quit
ZQ	Quit without saving
Exiting insert mode	
Esc | C-[	Exit insert mode
C-C	Exit insert mode and abort current command
:cq | cquit	Exit with error
Counters	
C-A	Increment number
C-X	Decrement number

Editing			
Editing		**Clipboard**	
a	Append	X	Delete char
A	Append from end of line	dd	Delete line (cut)
i	Insert	yy	Yank line (copy)
o	Next line	p	Paste
O	Previous line	P	Paste before
s	Delete char and insert	"*p | "+p	Paste from system clipboard
S	Delete line and insert	"*y | "+y	Paste to system clipboard
C	Delete until end of line and insert	**Visual mode**	
		v	Enter visual mode
r	Replace one char	V	Enter visual line mode
R	Enter replace mode	C-V	Enter visual block mode
u	Undo changes	:%s/foo/bar/g	Replace foo with bar in whole document
C-R	Redo changes		

Navigating					
Directions		**Character**		**Window**	
h j k l	Arrow keys	fc	Go forward to char c	ZZ	Center this line
C-U | C-D	Half page up/down	Fc	Go backward to char c	zt	Top this line
C-B | C-F	Page up/down	**Document**		zb	Bottom this line
Words		gg	First line	H	Move to top of screen
b | w	Previous/next word	G	Last line	M	Move to middle of screen
ge | e	Previous/next end word	:{num}	Go to line {num}	L	Move to bottom of screen
Line		{num}G	Go to line {num}	**Search**	
0	Start of line	{num}j	Go down {num} lines	n	Next matching search pattern
^	Start of line (whitespace)	{num}k	Go up {num} lines	N	Previous match
$	End of line			*	Next whole word under cursor
				#	Previous whole word under cursor

Operators				Tab pages	
Usage		**Operators list**		:tabedit file	Edit file in new tab
d	Operator	d	Delete	:tabfind file	Open file in new tab
w	Motion	y	Yank (copy)	:tabclose	Close current tab
Examples		c	Change (delete then insert)	:tabs	List all tabs
dd	Delete current line			:tabfirst	Go to first tab
dw	Delete to next word	>	Indent right	:tablast	Go to last tab
db	Delete to beginning of word	<	Indent left	:tabn	Go to next tab
		=	Autoindent	:tabp	Go to previous tab
2dd	Delete 2 lines	g~	Swap case		
dip	Delete text object (in para)	gU	Uppercase	**Jumping**	
		gu	Lowercase	C-O	Go back to previous location
d	Delete selection (visual mode)	!	Filter through external program	C-I	Go forward
				gf	Go to file in cursor

Vim

Text Objects

Usage		Text objects	
v	Operator	**p**	Paragraph
i	Inside	**w**	Word
a	Around	**s**	Sentence
p	Text object	**[({ <**	A [], (), {} block
Examples		**' " `**	A quoted string
vip	Select paragragh	**b**	A block [(
vipipip	Select more	**B**	A block [{
yip	Yank inner paragraph	**t**	A xml tag
yap	Yank paragraph (new line)	**Diff**	
dip	Delete inner paragraph	**gvimdiff file1 file2**	See difference between files
cip	Change inner paragraph		

Tags

:tag class	Jump to first definition of class
C-]	Jump to definition
g]	See all definitions
C-T	Go back to last tag
C-O C-I	Back / forward
:tselect class	Find definitions of class
:tjump class	Find definitions of class (auto)
